Experience

MAY 2023 - TILL NOW

Freelance

JUNE - MAY 2023

WebMasters, Kyiv - *Trainee Front-end dev.*

A small studio that made advertising pages for various businesses on the Internet. The development team consisted of three people. In this team I was engaged in writing layout and implementation of already written scripts on the pages of the test site, then superficially tested the site for bugs and in the end gave the finished version to the senior developer. Participated in calls and discussions about the implementation of projects. Skills that were used: JS(React), HTML/CSS, GIT
